

Combining the highest standards of live broadcast with the flex and security of cloud infrastructure, M2A LIVE delivers fully functional live video workflows on demand.

## Simplicity at scale

Live streams scaled and tailored for global audiences

M2A LIVE is trusted by tier-one broadcasters, OTT platforms and sports rights holders to deliver reliable, low latency, highest quality live streams to millions of viewers worldwide across any device using the flexibility and scale of public cloud. M2A LIVE makes management of live streaming services simple with the market-leading M2A Console putting control in the hands of your operators.

With the option to include M2A Media's leading ad-decisioning services, M2A LIVE offers full Server Side Dynamic Content Insertion delivering the most comprehensive monetisation and localisation solutions for both 24/7 channels and event-based live streaming.

Our London-based MCR gives security and assurance meaning that your live streams and, ultimately, viewer satisfaction are protected at all times.

Trust M2A LIVE for your streaming needs. M2A LIVE regularly manages 3m+ concurrent views with ease with options for added redundancy and reliability.

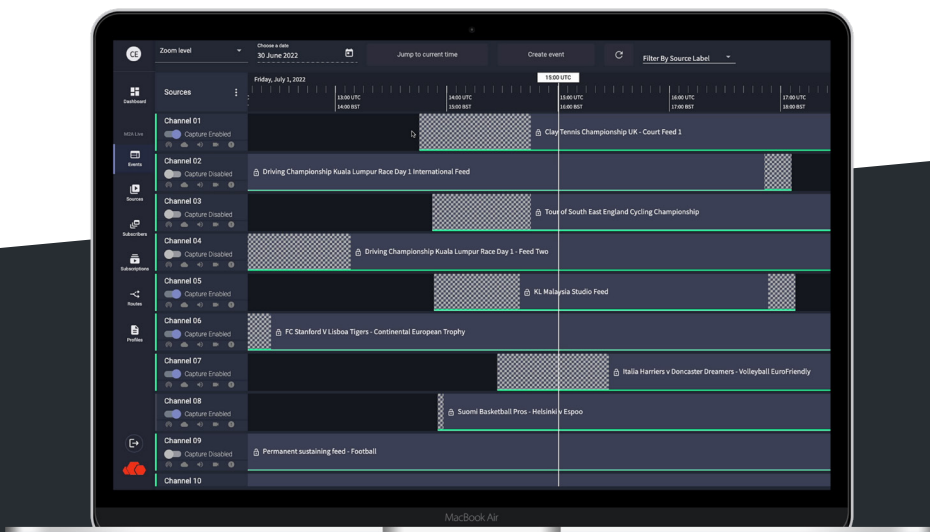

## Enrich the streaming experience with

ADD-ONS

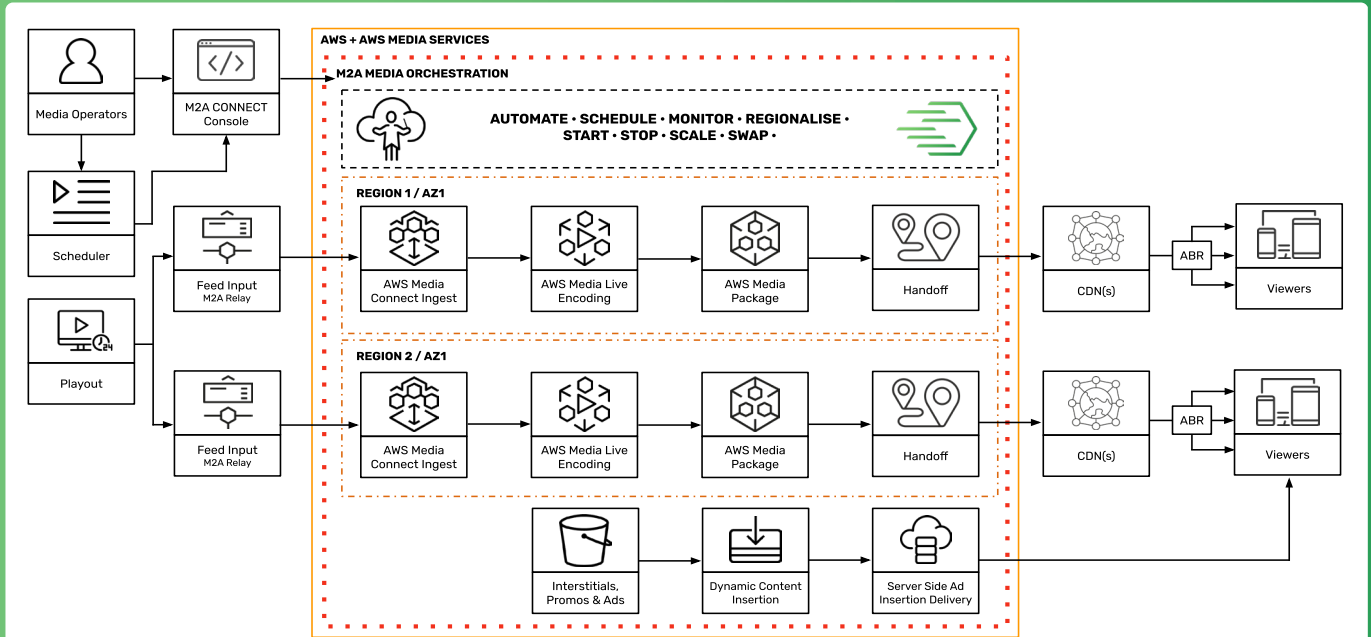

M2A LIVE customers can tailor services to their needs and budget with Add-ons including:
